Int'l PAT-P. 2009

**SPEC**

Model Code	NK-125
Blade	125mm/T1.5-2.2 Diamond Blades.
Cut Depth	5-33mm
Weight	520g (Main Unit)
Grinder	BOSCH GWS9-125/GWS10-125/GWS14-125, MAKITA 9558NB/9565CV, HITACHI G12SR3/G13SE2/G13SB3 ...etc.

**Dust Bag needs emptying with every 3m of cutting.\***  
\*We recommend preparing a number of dust bags for efficient work.

**HYBRID Dust Collection**

TORNADO has 2 ways of dust collection. You can choose between the self-vacuum mode and connecting to a vacuum cleaner, which removes nearly 100% of dust.

**Easy Blade Change (EBC) system**

With our revolutionary EBC system, the blade can be changed with just one operation.

**Universal Design**

Exchangeable connector enables use with a wider range of Grinders.  
\*We continually update our products to ensure compatibility with the latest Grinders.

**Tornado Duct**

Spiral formed "TORNADO Duct" does not impede the view of the cutting line nor the space around the operation handle.
