

(1) Loosen M4 Bolt x 3pcs. at back side and detach the Adapting Unit.

(2) Detach the Bracket Cover and attach **[p] Hook** (this part) to the Lower Brackets. (2pcs.)

(3) Change the Upper Bracket direction by operating [d] Wrench.

(4) Turn the Lower Bracket counterclockwise until it stops. (2pcs.)

(5) Re-tighten M4 Bolt x 3pcs. to return the Adapting Unit to its original position.

※ Pay attention to the position of the M4 Bolts relative to the slotted hole.
